

# CASE STUDY

# OIL & GAS

## Oil & Gas Industry USA

The oil and gas industry in the United States is one of the largest in the world. In 2019, the US oil and gas industry employed over 1.1 million people, generated over \$1.3 trillion in economic value, and contributed over \$229 billion to federal, state, and local taxes. The US also leads the world in oil and gas production, contributing approximately 19.2% of the world's total oil and gas production in 2019.

## Safety & Sustainability

Companies are required to meet stringent safety standards, and many have taken additional steps to enhance safety and sustainability, such as investing in advanced technology, training and education, and environmental programs. Additionally, companies must comply with federal and state regulations and standards designed to protect public health, safety, and the environment.

## Using EcoChemPro to Clean & Degrease in the Oil & Gas Industry

EcoChemPro supports companies in the oil and gas industry by providing a range of safe to use cleaning products designed to tackle the specific needs of the industry. EcoChemPro offers products to clean and degrease oil production equipment, tanks, pipelines and other related parts, whilst reducing the need for teams to wear heavy hazmat suits.

One of EcoChemPro's clients in New Iberia, Louisiana said *"EcoChemPro gives us a safe to use solution for cleaning our oil field parts and equipment. We have five cleaning stations where operators wash and clean various equipment. Most of the parts come in dirty, with thick oil deposits, and general grime. Our teams are responsible for returning the equipment to a clean condition ready for dispatch to the oil fields. We enjoy using EcoChemPro as it's pH neutral and doesn't burn so we don't need to wear hot and uncomfortable Hazmat suits. The product cleans effectively and is a safe solution for our people."*
