

FOCUS ON REDUCING PPE USAGE

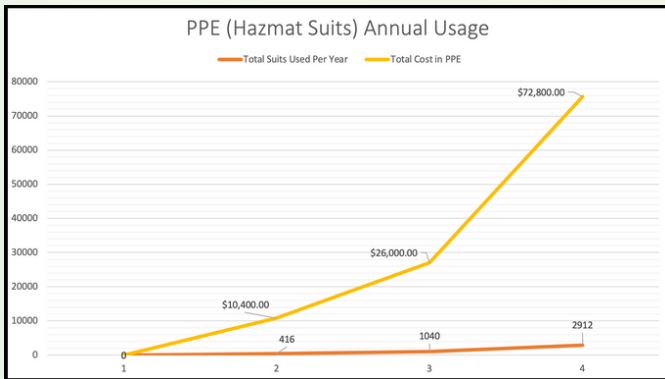

Making Savings on P.P.E. and Reduce Heat Stress!

As global temperatures increase, concerns over heat stress in the workplace is rising too. With an estimated 600 to 1,000 people dying each year in North America, organizations are looking for practical ways to reduce the risks heat brings to the workplace. Those who have to wear HAZMAT suits are at higher risk from heat stress, due to the bodies inability to cool effectively. Organizations who clean with heavy caustic products are looking for smarter, more innovate ways to clean using less PPE.

EcoChemPro Save Clients up to \$72,800 Annually on reduced PPE.

Client's using EcoChemPro XL save money on reduced PPE usage, compared to clients who clean with heavy caustics. On average, clients who clean four times per week with two personnel save on average \$10,400 per year. Clients who clean seven days per week with a team of eight people save on average \$72,800 per annum. Prices shown are based on an average price of \$25 for a disposable Type B Hazmat Suit.

EcoChemPro is Safe to Use Without HAZMAT Suits.

EcoChemPro XL's pH neutral formula gives teams a powerful cleaning product *without the need to wear heavy, hot, rubber HAZMAT suits*. Cleaning is completed more effectively and teams can work without the increased risks associated with heat illness. In addition EcoChemPro XL's green chemistry contains no VOC's, no acids, no alkalis, no butyl's and is better for the environment too. This Green Cleans!
